SUMMARY

Product-focused full-stack software engineer with 5+ years of experience delivering applications from concept to production across web, mobile, backend, and connected-device environments. I lead fast validation cycles from CEO or business ideas to PoC, then evolve validated concepts into MVPs and scalable production systems. My work spans tech-stack selection, React and React Native development, backend services, CI/CD automation, peripheral-device integration, and reliable data acquisition pipelines.

SKILLS

Programming languages: TypeScript, JavaScript, Python, Java, Swift

Frontend and Mobile: React, React Native, HTML, CSS, SCSS

Backend: NestJS, Node.js, Express.js, Spring, Flask

Data & Messaging: MongoDB, Redis, RabbitMQ

EXPERIENCE

Full Stack Developer, HABS

Feb 2025 - Present | FR, Paris

Contribute to software systems for biometric signal acquisition, processing workflows, and protocol execution.

- Own end-to-end delivery across React, React Native, backend services, and infrastructure workflows, from initial concept to production release.
- Translate leadership and business ideas into rapid PoCs for fast validation, then convert successful PoCs into MVP and production-grade features.
- Select and evolve technology stacks based on product constraints, delivery speed, maintainability, and scaling requirements.
- Implement integrations with peripheral devices and data-capture pipelines, including communication, ingestion, and system-level reliability improvements.
- Build and maintain CI/CD pipelines to reduce release friction, improve deployment confidence, and accelerate iteration cycles.
- Drive product growth by shortening time-to-market while keeping architecture stable enough for long-term scaling.

Software Application Developer, AuxaSphere (TemmaCare)

Jun 2022 - Feb 2025 | FR, Paris

Developed and supported a suite of applications for secure and reliable digital data exchange in hardware/software systems for remote medical diagnostics

- Designed and implemented new features and microservices
- Mentored, refactored, optimized, and conducted code reviews
- Medical device data visualization, encryption, storage, and delivery.
- Designing and implementing UX & UI for a multi-role system
- Built reusable packages with strict typing

Research Engineer, Inria & Femto-ST

Oct 2020 - Sep 2021 | FR, Lille

Designed and implemented modular robots with dynamic configurations

- System description using deterministic finite state machines
- Strengthening the time synchronization protocol for modular robots
- Implementation of synchronization algorithms for modular robots

Research Engineer, Polytech Nantes

Jan 2020 - Jul 2020 | FR, Nantes

Embedded device security research system development

- Implementation of the RSA crypto algorithm on the STM32 microcontroller
- Investigation of vulnerabilities via third-party side channels using DMA.

EDUCATION

Master of Internet of Things, *Université Bourgogne Franche-Comté, Montbéliard, 2020 - 2021*
The 7th engineering school in France

Master of Wireless Embedded Technologies (double diploma), *Polytech de Nantes, 2019 - 2020*
First student in exchange partnership with TUSUR.

Master of Communication Systems and the Internet of Things, *TUSUR Tomsk 2018-2020*
The leading Russian university in the fields of control systems, radioelectronics, and biomedical technologies.

Bachelor of Audio Visual Technologies, TUSUR, Tomsk 2014-2018

Other

Languages: French (B2), English (B2), German (A1), Russian (native)

Skills: Docker, Git, CI/CD, Linux, SSH, Shell, C, C++, Arduino, MicroPython, ROS, RTOS, PCB, CubeMX, LaTeX, Soldering

SIDE PROJECTS

- Cross-platform music app for distributing tracks with limited listening rights
 - Social network, designed to encourage users to engage in various outdoor activities
-

INTERESTS

My hobbies are automation and smart device development (IoT). In my free time, I create controller-based devices and run my own home server with a Raspberry Pi.

I express myself artistically through music, playing multiple instruments. Passionate about various sports such as cycling, bouldering, skydiving, rollerblading, and table tennis. I also cultivate my interest in mechanics by repairing vehicles, from cars to scooters.

My multifaceted interests reflect my relentless curiosity and commitment to continuous learning.
